

DAYCO AFTERMARKET TECHNICAL INFORMATION

Date: April 2020
N°: T00025
Subject: Water Pump DP884
Fitting Information on VAG
1.6ltr & 2.0ltr Tdi Applications
(includes KTB884EP Timing Kit)

Dayco DP884 Water Pump is a direct replacement for the following VAG OEM part numbers:

04L 121 011	04L 121 011E	04L 121 011M	04L 121 011P
04L 121 011H	04L 121 011L	04L 121 011V	04L 121 011LV

The OEM Water Pump has a switchable mechanism in the assembly to facilitate rapid warm up in the vehicle's cooling system which is governed by a solenoid actuator as shown in the images below. When replacing the pump, the actuator should be removed from the pump and fitted to new pump.

Although a non-switchable type, the Dayco DP884 water pump is a direct replacement to the VAG OEM's, the solenoid mechanism is still housed as per OEM and is fully compatible with the vehicle's cooling system.
